The Nikola Tesla Inventors Club was formed to promote the legacy of Nikola Tesla by raising awareness of his accomplishments, picking up where Tesla left off, and furthering his work. We bring together those with a genuine interest in Tesla through educational programs, workshops, meetings, and public events. NTIC also selects several inventors per year who have demonstrated a promising idea that exemplifies Tesla's life and work. We help patent and and bring these ideas to market by forming an appropriate team of professionals including engineers, attorneys, and business/marketing specialists.
